4. Setup and Configure a LAN (Local Area Network) using a switch and Ethernet Cables in your lab.

Aim:

To Setup and Configure a LAN (Local Area network) using a Switch and Ethernet Cables in your Lab.

procedure:

Step 1: plan and Design an approximated network topology taking into account network requirements and equipment location.

Step 2: you can size 4 Computers a switch with 8, 16 or 24 ports used network of these size and 4 Ethernet cables

Step 3: Connect your computers to network Switch.

Step 5: Configure a network Switch:

1) Connect your Computer to the Switch: To access the Switch using an Ethernet cable.

REDMI 13C 5G 19/10/2026 17:12

2) Log in to the web interface: open a web browser and enter the Ip address of the interface. Enter the username and its password. to log in.

3) Assign Ip address as 10.1.1.5 Subnet mask 255.0.0.0

Step 6:

Check the Connectivity between Switch and other machine by using ping Command in the Command prompt of the device

Step 7:

Select a folder → go to properties → click Sharing it with everyone on the Same LAN.

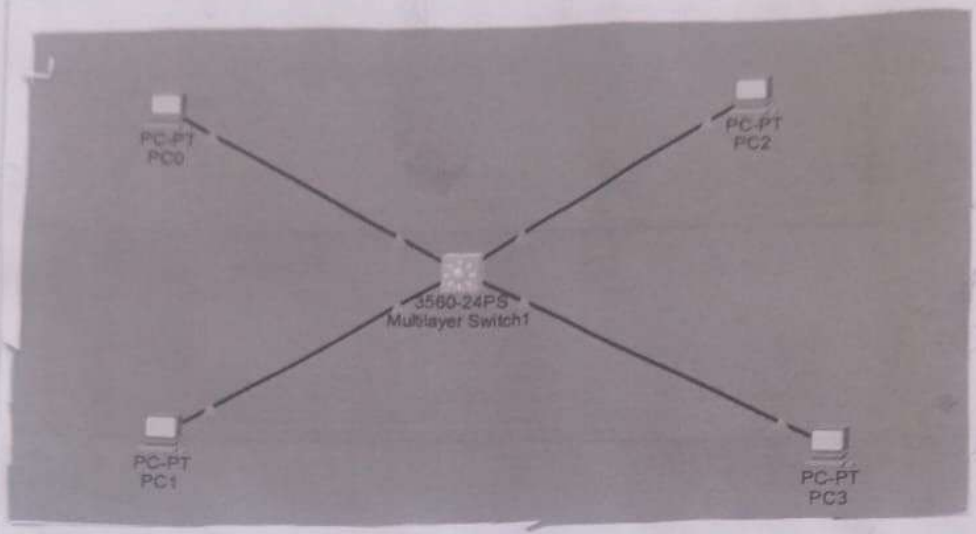

Step 8:

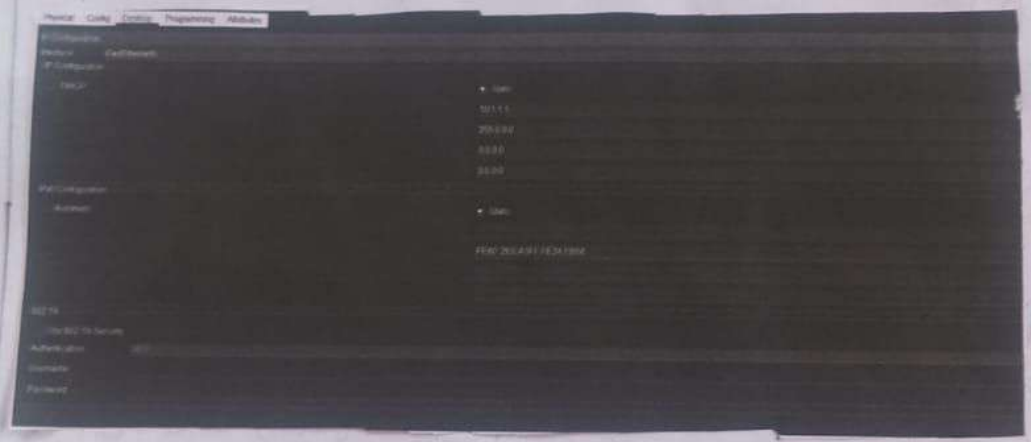

Try to access the shared folder from another Comper of the network.

Result:

Therefore, Thus the Setup and Configure a Switch Ethernet Cable in your lab.
